

Corillian and NCR Partner to Meet the Online Banking Needs of Community Banks and Credit Unions

November 19, 2003 at 11:04 AM EST

DAYTON, Ohio & PORTLAND, Ore.--(BUSINESS WIRE)--Nov. 19, 2003--

Partnership Builds on Success to Deliver Comprehensive Solution to
Address Underserved Markets

Corillian Corp. (Nasdaq:CORI), the top provider of online banking solutions to leading financial institutions, and NCR Corporation (NYSE:NCR) today announced a joint online banking solution specifically designed to meet the needs of the community bank and credit union markets. This announcement represents an expanded agreement that builds on the joint success that Corillian and NCR share in successfully delivering integrated online banking solutions and services to leading financial institutions.

The new solution leverages the capabilities of the industry-leading Corillian Voyager online banking platform and its applications supporting multiple lines of business, including consumer banking, small-business banking and cash management. NCR will serve as a preferred reseller for the Corillian Voyager platform and host the solution in its state-of-the-art eCommerce operations centers. The joint solution will deliver a rapidly deployable, comprehensive online banking solution to meet the needs of the underserved community bank and credit union markets.

In addition, this expanded agreement leverages NCR's commitment of service to community banks and credit unions, including hundreds of established relationships in these markets. The Corillian/NCR partnership will bring this best-in-class online banking functionality together with comprehensive integration and hosting services to community banks and credit unions that are looking for a rapidly deployable, cost-effective online banking solution.

"We are excited to build on the success we've had with NCR to deliver an integrated solution to the community bank and credit union market," said Alex Hart, president and chief executive officer of Corillian. "Many of these financial institutions are looking for ways to stay competitive and deliver innovative online financial services, but they lack the capability to provide these services to their customers. This expanded partnership with NCR will bring the proven capabilities of the Corillian Voyager platform to a market that has historically not had access to our state-of-the-art online solutions. NCR's world-class services make them the ideal partner to deliver this joint solution to this market."

"NCR is excited to deliver the power and scalability of the Corillian Voyager consumer and business banking platform in a cost-effective, affordable solution package. We feel the combination of Voyager along with NCR's value-add eCommerce capabilities and self-service expertise will deliver a superior solution to community banks and credit unions," said Greg Hanson, NCR e-Commerce solutions general manager.
