

Wachovia Selects Teradata Warehouse for Basel II Compliance; Consolidation of Data to Enable Compliance and New Business Intelligence Capabilities

November 16, 2005 at 11:01 AM EST

DAYTON, Ohio--(BUSINESS WIRE)--Nov. 16, 2005--Teradata, a division of NCR Corporation (NYSE:NCR), announced that Wachovia Bank, N.A. (NYSE:WB), has selected Teradata(R) warehousing technology and the Teradata Financial Services Logical Data Model as the foundation for its risk data platform. The Teradata choice will enable a platform to build enhanced risk management capabilities, including the deployment of many aspects of the proposed Basel II initiative that promotes the adoption of sound corporate governance practices by banking organizations.

The Wachovia risk information management effort will consolidate numerous data sources across the enterprise into a centralized warehousing environment to meet the higher data management standards of the emerging Basel II Accord and support emerging business intelligence requirements.

"The Teradata solution is attractive to Wachovia because, once the risk information management program is in place, we can leverage the Teradata investment to reduce the overall cost and complexity of our business intelligence systems," said Nancy Church, Wachovia's chief information officer of Shared Services.

"Wachovia will demonstrate its market leadership as it deploys a risk information management environment with an enterprise data warehouse as its technology foundation," said Kris Robinson, vice president, Teradata. "We are proud to work in partnership with Wachovia to support this significant undertaking."
