

Self-Service Shared Branching Becomes Reality: NCR and Ensenta Partner to Offer the First Shared Branch Kiosk

October 26, 2007 at 11:01 AM EDT

Enhanced Transaction Information and Capabilities Available at
Participating Credit Unions and Kiosk Locations

DAYTON, Ohio--(BUSINESS WIRE)--Oct. 26, 2007--NCR Corporation (NYSE:NCR) today announced an enhanced technology platform which delivers a first-of-its-kind opportunity for the nation's credit unions. Designed for greater efficiency and service, the new NCR Shared Branch Kiosk program is powered by a web-based engine from Ensenta, the Redwood Shores, Calif.-based leader in self-service network solutions to credit unions.

The program enables credit union members and "guest" shared branching members to conduct a wide range of financial transactions. Members can also transact and view all of their account information, even when using a self-service terminal at another participating credit union or location, such as at Vcom(R) units located in 7-Eleven stores.

The new program includes all of the hardware, software and services to allow an enhanced set of "on-us" (the credit union's own members) and shared branch transactions on a participating kiosk or automated teller machine (ATM). The program is built on NCR's easypoint ATM 3800 Shared Branch Kiosk and includes complete maintenance and consultancy services.

NCR and Ensenta brought together key industry leaders to provide this innovative program. Ensenta provides the terminal driving, switching and check image processing software as a service, while CO-OP Shared Branching, powered by Credit Union Service Centers' Next Generation Network and Financial Service Centers Cooperative, enable the shared branch capability to more than 35 million members.

"With this program, self-service shared branching truly becomes a reality. Many shared branch credit unions are excited about offering these expanded services, which are now readily available and conveniently offered through these unique self-service terminals," said Brian Pilla, NCR's director of Marketing and Deployment for Financial Solutions in North America.

For credit union members, this new service means more locations and extended hours, as well as greater flexibility with a full array of financial transactions. They also gain a more intuitive and informative experience by having all of their banking relationships displayed and updated. Additional features include increased verification through on-screen postings and updates, as well as check images printed on receipts, and Intelligent 'No-Envelope' Deposit transactions.
