

NCR Announces Reseller Agreement with Sage Software Healthcare, Inc. to Deliver Self-Service Solution to the Physician Market

May 8, 2008 at 10:01 AM EDT

Agreement will Allow Physician Practices of All Sizes to Deploy

Self-Service Solution While Ensuring Interoperability with Electronic

Health Records

DAYTON, Ohio--(BUSINESS WIRE)--May 8, 2008--NCR Corporation (NYSE: NCR) and Sage Software Healthcare, Inc., a provider of practice management and electronic health records software, announced today they will collaborate to provide physician practices with a highly integrated solution that combines the functionality of NCR's MediKiosk(TM) with Intergrity EHR by Sage. Together, these products will allow healthcare providers to manage their operations more efficiently, including financial, clinical and administrative processes.

As an authorized NCR reseller, Sage will enable users of Intergrity EHR to quickly deploy NCR MediKiosk, a self-service solution that empowers patients to check in for office visits, update demographic and insurance information, and electronically sign consent forms. Integration between the two systems, to be debuted later this year, will enhance a patient-centered approach to practice management that improves patient flow and increases overall efficiency.

"To be successful in today's healthcare environment, physician practices need proven technology applications that streamline workflow and reduce costs," said Michael Burger, director of Clinical Product Management at Sage Software. "Soon, practices of all sizes will be able to cost-effectively leverage self-service technology so they can reduce paperwork, speed the patient check-in process and increase patient satisfaction."

Sage will market NCR MediKiosk to its thousands of ambulatory practice customers, enabling these organizations to automate patient check-in and check-out processes. The solution is designed specifically for the small practice market, enabling these groups to automate manual processes through a streamlined deployment process that requires minimal IT resources. According to the Centers for Disease Control, more than 90 percent of practices in the United States have five physicians or less.

"The small practice market stands to benefit a great deal from self-service technology, particularly in terms of increased staff productivity," said Chakri Toleti, vice president, Healthcare Industry Marketing, at NCR. "With this automation, practices can maximize staff resources and eliminate the need to copy, scan and manage paper forms. As a result, staff members will have more time to devote to mission-critical tasks."

About Sage Software Healthcare, Inc.
