

Moneycorp Chooses NCR and ATMRC to Quickly Deploy Innovative, Weatherized ATMs

January 22, 2014 at 8:00 AM EST

NCR and ATMRC provide reliable, secure and easy-to-use NCR SelfServ™ ATMs for Moneycorp's on-street, city centre pods in the U.K.

LONDON--(BUSINESS WIRE)--Jan. 22, 2014-- [NCR Corporation](#) (NYSE: NCR), the global leader in consumer transaction technologies, announced today that [Moneycorp](#) has deployed weatherized [NCR SelfServ™ 28](#) ATMs in city center locations around the U.K. to provide a reliable, secure service for customers. The NCR ATMs are conveniently designed for busy city center locations. Moneycorp worked closely with NCR and NCR partner, ATMRC, to quickly design, test and deploy the ATM solution. This ensured a timely and effective deployment for Moneycorp's on-street ATMs, helping to future-proof its business and increase profitability.

"As opportunities to provide customers with on-street cash withdrawal services increase we had to quickly evolve the solutions we deploy in city-centres," said Alan Chambers, Head of Automated Cash at Moneycorp. "NCR and ATMRC have been our partners of choice since Moneycorp ATMs were launched. Their ability to quickly design, test and launch our new generation of on-street ATM solutions is testament to the great relationship. The innovative, weatherized hardware solutions deployed in our pods have proved easy-to-use for customers, especially those from overseas, and allowed us to effectively future-proof and grow our business."

NCR's SelfServ 28 ATM is the industry's leading weatherized, freestanding ATM that can be deployed inside or outside. It is able to complement ATM provider's existing ATM network as it can go wherever your customers need service, without the need to build a structure to house the ATM. It is designed to be easily deployed and redeployed anywhere—indoors or outdoors—with minimal infrastructure requirements, providing maximum brand exposure, transaction volumes and revenue combined with a low cost of ownership.

"Providing a reliable, secure and easy-to-use service for consumers is key for businesses as they ensure a great experience for today's time-starved consumer," said Rachel Nash, director of Financial Services at NCR U.K. "Working alongside ATMRC to deploy this kind of cash withdrawal solution in high footfall locations has driven the rewarding innovation that is apparent in the Moneycorp pod. Our SelfServ 28 solution is perfectly suited to their business needs and is the only weatherized ATM in the market today."

With both wired and wireless connectivity, the SelfServ 28 ATM needs only a power outlet to operate and with a temperature range from -50 to +35 degrees centigrade does not require a structure to protect it from the weather – making it more environmentally friendly by reducing the carbon footprint of offsite buildings.

"Innovative solutions to consumer demands are often driven from the partnerships that work well at all levels," said Kim Cheah, Sales Director at ATMRC. "Working alongside NCR to launch Moneycorp's new on-street ATMs only took a few months. This is a result of the long, three-way relationship that enabled us to refine the overall solution over time and deliver on Moneycorp's requirement for reliable, secure and easy-to-use technology that will future proof its business and help it grow."
