

NCR and iATMglobal Team to Deliver E-commerce on ATMs

August 9, 2000 at 2:32 PM EDT

DAYTON, Ohio, Aug. 9 /PRNewswire/ -- NCR Corporation today announced an ATM e-commerce alliance by taking a strategic equity interest in iATMglobal, which provides retailers, financial institutions and non-bank deployers of ATMs a turnkey software infrastructure that enables e-commerce transactions and fulfillment on ATMs through use of the Internet.

San Francisco-headquartered iATMglobal provides a software-based network that transforms existing ATMs into Internet ATMs. In conjunction with strategic e-commerce partners, iATMglobal's product suite will deliver to ATM users a wide variety of e-commerce transactions now available on the Web, such as movie, event or travel ticketing, pre-paid long distance or cellular service, Internet banking services or Internet product purchases.

Shami Patel, president of iATMglobal, said that: "NCR and iATMglobal are making it easy for companies to migrate their e-commerce offerings to ATMs deployed by retailers, banks and ISOs."

"iATMglobal enables companies to transform their web-based product presentation to the capabilities of current and future ATM technologies. The consumer now has a convenient and easy way to access Internet products and services," explained Patel. "With the initial rollout on NCR's ATMs, the consumer will see the value of this Internet capability and we'll provide the ATM owner a new revenue stream."

Pat Cronin, senior vice president of NCR's Financial Solutions division said the iATMglobal solution fits tightly with the NCR strategy of enabling all ATMs with e-commerce capabilities.

"iATMglobal gives ATM owners an easy way of activating e-commerce transactions on ATMs," said Cronin. "Imagine the tremendous opportunity for businesses to provide more services to the consumer and create new, profitable revenue streams without costly upgrades."

NCR and iATMglobal are planning a launch later this year at retail convenience store locations currently using NCR's MCD ATMs.

About iATMglobal

iATMglobal provides end-to-end e-commerce solutions for retailers, financial institutions and non-bank deployers of ATMs by Internet enabling legacy and future ATMs. iATMglobal's infrastructure gives the ATM owners, operators, and deployers flexibility to choose from an aggregated portfolio of e-commerce offerings. The company's solutions are based on extensive industry expertise in ATM software development and its relationships with e-commerce merchants. iATMglobal has offices in the United States and the United Kingdom.
