NCR and Netigy Team to Provide E-Business Infrastructure Services

February 1, 2001 at 1:32 PM EST

DAYTON, Ohio, Feb. 1 /PRNewswire/ -- NCR Corporation's (NYSE: NCR) Worldwide Customer Services Division and Netigy Corporation today announced an alliance to enable businesses to design and implement technology infrastructures for e-business.

Conducting business using the World Wide Web requires a comprehensive infrastructure that integrates servers, networks, security and operations. This provides a significant challenge to most organizations, since few have the required experience in all pertinent arenas. NCR and Netigy believe this alliance will answer the challenge. NCR provides global capabilities in consulting, project management, product procurement, implementation and maintenance. Netigy provides technology consulting services that focus on the planning, design, implementation and measurement of infrastructures for e-business strategies.

"The combination of NCR and Netigy answers a market need," said Netigy Senior Vice President Brendan Keegan. "What our clients want is comprehensive, world class consulting on products, applications and performance so they can best architect and build out their infrastructure. The global presence and expertise of a Netigy/NCR combination offers just that."

"Netigy's consulting abilities in security, SS7 and optical design, and NCR's deployment and support capabilities create a unique lifecycle solution for companies faced with large-scale e-business projects," added Chuck Weirauch, NCR's vice president of E-Business Infrastructure Services.

About Netigy

A premier architect of eBusiness infrastructure, Netigy is setting the highest standards for 24x7 eBusiness performance. With a full lifecycle of services and an accountability-based approach, Netigy ensures the eBusiness infrastructure is prepared to handle the traffic volumes, performance requirements, and security standards necessary in the Internet economy. Headquartered in San Jose, California, Netigy supports enterprise and service provider clients and is aggressively expanding into the global marketplace.
