

NCR and Corillian Ink Internet Banking Alliance

March 1, 2001 at 8:37 AM EST

DAYTON, Ohio, March 1 /PRNewswire/ -- NCR Corporation's (NYSE: NCR) Worldwide Customer Services Division and Corillian Corporation (Nasdaq: CORI) today announced an alliance which will expand NCR's Internet banking service.

The agreement calls for NCR to use Corillian's Voyager platform as the core consumer banking component for mid- to large-sized financial institutions. NCR will customize the Voyager software to allow financial institutions greater flexibility in delivering Internet financial services to their customers. NCR's Internet banking service is run in a managed server model from its secure and high availability data centers in Columbia, Md. and Dallas, Texas.

"NCR's vast experience in working with financial institutions on delivering enhanced Internet banking solutions made them the perfect partner for us," said Ted Spooner, chief executive officer of Corillian. "This experience is critical in the e-finance industry as financial institutions are looking for ways to take advantage of the Internet as a compelling delivery channel. We are excited about the possibilities that this partnership will bring to the industry."

"Corillian's Voyager gives us great flexibility in tailoring the application based on the financial institution's requirements," said NCR e-Commerce Solutions General Manager Greg Hanson. "This agreement broadens our offering for mid- and large-sized banks, and helps achieve our vision of integrating the best e-finance technologies. Corillian is a welcome addition to our e-finance family of alliances, which include S1, Intuit, Microsoft, and many others."

Whether it's for a start-up deNovo or a \$75 billion bank, NCR's Internet banking service supports a variety of "best in class" components including bill payment, account aggregation, web portals, Open Financial Exchange (OFX), cash management, business banking, and mortgage and consumer loan origination.

About Corillian Corporation

Based in Oregon, and with international offices in Europe and Asia, Corillian Corporation is an award-winning provider of eFinance-enabling software for the financial services industry. Built on the Microsoft Windows 2000 platform, Corillian applications support Internet banking, bill delivery and payment, brokerage, customer relationship management, enhanced data aggregation, and small business transactions. Voyager can be deployed on-site at the financial firm or at a secure data center. Corillian technology also enables Open Financial Exchange (OFX) access by finance management software packages such as Quicken(R), QuickBooks(R) and Microsoft(R) Money.
