NCR Ships More Than 1,000 Self-Checkout Systems

April 23, 2001 at 2:32 PM EDT

ATLANTA, April 23 /PRNewswire/ -- NCR Corporation (NYSE: NCR), the global leader in retail store automation solutions, today announced it has shipped more than 1,000 self-checkout systems, the technology that allows shoppers to scan, bag and pay for their own items.

"Retailers are investing aggressively in NCR technology to improve efficiency and reduce costs in this challenging economic environment," said Mike Webster, general manager for NCR Self-Checkout. "What was a novelty a year ago is quickly becoming a key component of store design."

Retailers taking receipt of NCR Self-Checkout units include Albertson's, Wakefern, K-VA-T Food City and Kmart. Customer usage has been reported as high as 37 percent of in-store transactions.

"We are seeing customers move beyond the pilot stage and convert to rollouts based on the superior flexibility and ease of use of the NCR Self-Checkout solution," said Webster.

Technologically savvy retailers may see shopper loyalty as an additional benefit. An NCR-sponsored study conducted late last year revealed that 33 percent of respondents indicated they would be more likely to frequent a store that offered self-checkout terminals, and one in four customers already use it regularly.

About NCR's Retail Solutions Division

NCR's Retail Solutions Division, headquartered in Atlanta, is a leading global provider of store automation solutions, including point-of-sale solutions, self-checkout, Web kiosks, bar code scanners and electronic shelf labels.
