

## **NCR Approves U.S. Wireless Data's Synapse Adapter(TM) for Remote Connectivity**

October 26, 2001 at 10:33 AM EDT

LAS VEGAS, Oct 26, 2001 /PRNewswire via COMTEX/ --

### ***Compatibility enables connection to ATM switch providers using cellular infrastructure***

NCR Corporation (NYSE: NCR), the global leader in self-service solutions, has approved a remote access option made available by U.S. Wireless Data Corporation as compatible with NCR's off- premise, retail automated teller machines (ATMs). Announced at the National Association of Convenience Stores show in Las Vegas, the "Synapse Adapter(TM)" solution features Cellular Digital Packet Data (CDPD) technology, an offering that dissects data files into multiple packets of information and transmits that information using existing cellular systems.

The Synapse Adapter is certified by most major switch providers and enables remote ATM access without "hooking up" via traditional phone lines. NCR has confirmed its Convenience TouchPoints(TM) ATMs will accommodate the CDPD modem. The Synapse Adapter option is of particular interest to deployers interested in temporary ATM setup for major events and other instances where wireless connectivity is more cost-effective than dial-up.

Brad Lozier, vice president of NCR's Financial Solutions Division, Americas region, said, "We are showcasing this technology because it offers yet another flexible solution for retailers and deployers to consider. Just a few years ago, no one thought of ATMs that weren't encased in the wall. Yet, look at the popularity of retail deployment today. When phone lines are not readily available or prove too costly to install on a temporary basis, CDPD may be the answer."

#### **About U.S. Wireless Data**

U.S. Wireless Data (OTC: USWE), and its subsidiary NXT, make credit card and ATM transactions work faster and more economically. USWD connects credit card processing companies to their merchant clients. Using wireless and landline technology, USWD provides improved transport, data translation, and value-added processing. In addition, by enabling wireless point of sale terminals, USWD adds speed and mobility that has been unachievable in the past. USWD now handles more than 500 million transactions each year through its centralized computer center and nationwide network.
