

Burger King Corporation Extends POS Contract with NCR to International Locations

December 9, 2002 at 2:04 PM EST

ATLANTA--(BUSINESS WIRE)--Dec. 9, 2002--NCR Corporation (NYSE:NCR)

NCR Deploying Terminals, Software and Services to Corporate-Owned Restaurants Outside the U.S.

Building on the successful deployment of point-of-sale (POS) terminals from NCR Corporation (NYSE:NCR) in all of its U.S.-based, corporate-owned restaurants, Burger King Corporation (BKC) is expanding the relationship to make NCR its POS provider in other countries.

Already installed in 600-plus U.S. locations, NCR's award-winning Compris(TM) food service software, support services and NCR RealPOS(TM) 7454 terminals are now being deployed throughout BKC's 259 company-owned restaurants in Canada, the United Kingdom and Mexico.

Designed to address the business needs of quick service and fine dining establishments, the NCR RealPOS 7454 combines POS functionality, security and an advanced user interface - all in a small footprint.

BKC uses the complete Compris product suite including POS, labor management, cash management and inventory management. The Compris product suite provides BKC with the flexibility to utilize local languages, tax and currency support while leveraging common business practices throughout their corporate restaurants.

Developed to perform under constant-use conditions, the NCR solution is based on a scalable POS platform that will enable BKC to take advantage of new technologies to aid operations at the restaurant level. According to BKC executives, flexibility, investment protection and NCR's breadth of services and global support infrastructure were cited as key reasons for the win.

"This rollout enables us to not only leverage the latest Compris application and hardware technology from NCR, but to also implement and standardize our restaurant system platform on a global basis," said BKC's Vice President and Chief Information Officer Rafael Sanchez. "With NCR as our sole technology partner, we have a solution that enhances and efficiently supports the entire point at which we interact with our customers."

About Burger King Corporation

Burger King Corporation was founded in 1954 and created the American icon, the HOME OF THE WHOPPER(R), in 1957. The company and its franchisees operate more than 11,450 restaurants in all 50 states and 58 countries and territories around the world, with 91% of BURGER KING(R) restaurants owned and operated by independent franchisees. Since the company's founding in Miami in 1954, the BURGER KING(R) brand has become recognized for great flame-broiled taste and HAVE IT YOUR WAY(R) food customization. BURGER KING(R) restaurants were recently voted "Best Place for Burgers"(1). In the fiscal year ending June 30, 2002, the BURGER KING(R) system had system-wide sales of \$11.3 billion. Burger King Corporation is a part of Diageo (NYSE:DEO), the international food and drinks company. To learn more about the BURGER KING(R) system, please visit the company's website at www.burgerking.com.

(1) Based on a June 2002 nationwide telephone survey conducted by

an independent research firm of adults 18 and older who have eaten in fast food hamburger restaurants in the previous 30 days.
