

NCR Introduces New All-in-One Point-of-Sale Terminals

January 11, 2011 at 7:32 AM EST

New terminals expand NCR RealPOS product line and extend choice, flexibility and value to retailers and resellers globally

DULUTH, Ga., Jan 11, 2011 (BUSINESS WIRE) --

NCR Corporation (NYSE: NCR) today launched two new all-in-one point-of-sale solutions as part of its NCR RealPOS(TM) product line: the NCR RealPOS(TM) 50 and the NCR RealPOS(TM) 25.

The NCR RealPOS 50 provides a combination of performance, versatility and reliability to help retailers maximize their POS investment. It features a powerful and energy-efficient processor to run the latest graphical touch-based applications and deliver fast, personalized service.

Targeted for small and medium businesses, the NCR RealPOS 25 is an economical terminal that delivers exceptional energy efficiency, reducing the total cost of ownership for retailers. It operates without requiring a cooling fan.

Quick access to internal components and diagnostic indicators make both systems simple to install, highly serviceable and easy for associates to use.

With their versatile, multi-purpose design both terminals can function either as a point-of-sale device or a touch-based, multimedia kiosk for self-service applications. Offering flexible mounting options, the terminals can be placed on a counter, pole, bracket or wall. The systems can also be customized with optional bezel colors to match store aesthetics and branding.

As part of NCR's commitment to industry standard architecture, the new terminals provide an open platform for current and next-generation software applications, including NCR Advanced Store, the NCR Advanced Retail Solution and the NCR General POS software, as well as diverse solutions offered by NCR RealPartners.

"These two new all-in-one POS terminals bring more choices and exceptional value for retailers," said Greg Egan, vice president of product management for NCR Corporation. "NCR continuously looks to introduce innovative new products that create value for retailers, enabling them to realize operational efficiencies while improving their customers' shopping experience."

The new RealPOS terminals support multiple operating systems, including Microsoft Windows $^{(R)}$ Embedded POSReady 2009, Windows 7 and Windows XP Professional, as well as Novell SUSE $^{(R)}$ Linux Enterprise for Point of Service.

The new point-of-sale terminals will be shown at the National Retail Federation's BIG show in New York City, January 10-11, 2011 in booth #1903.
