Teradata Earns #1 Overall Ranking in Data Warehouse Comparisons from Leading Industry Analyst Firm

November 27, 2001 at 11:18 AM EST

DAYTON, Ohio, Nov 27, 2001 /PRNewswire via COMTEX/ --

Results reaffirm Teradata's leadership in most important data warehousing metrics

Teradata, a division of NCR Corporation (NYSE: NCR), announced that it received the number-one overall ranking in the newly released Gartner, Inc. Data Warehouse Application Server Evaluation Model (ASEM) update, which evaluates how various data warehousing providers stack up against each other.

The Gartner research note entitled, "Data Warehouse ASEM Update Reinforces Teradata Lead," describes how Teradata surpassed all competitors and achieved a near-perfect score in the database category.

Produced annually, the Gartner data warehouse ASEM update determines the suitability of various vendor platforms. The model calculates relative scores for all major database/hardware platforms based on the most important selection criteria for data warehousing, using 27 criteria in four categories.

Teradata's goal is to provide not only the best technology for data warehousing, but also superior services, partnerships and experience to translate the technology into high-value business solutions for its customers. The Teradata data warehouse provides businesses improved decision-making through speed and agility in storing, analyzing and interpreting data. This business intelligence enables companies to better serve customers, drive operational efficiency, and ultimately be more profitable.

Considered by many businesses to be the database of choice, Teradata can grow along with the changing data warehousing needs of the business, without limiting performance while providing a demonstrated business benefit.
