

NCR Introduces Industry's First 1 GHz POS Solution

January 15, 2002 at 10:34 AM EST

ATLANTA, Jan 15, 2002 /PRNewswire via COMTEX/ --

Intel Pentium III(R) 1 GHz processor to power NCR workstations

NCR Corporation (NYSE: NCR) today announced support for the Intel Pentium III(R) 1 gigahertz (GHz) processor on its high-performance point-of-sale (POS) workstations. With the Intel Pentium III 1GHz processor, NCR offers retailers a powerful and scalable platform to run the latest multimedia and electronic marketing applications.

"Integrating the power of 1 GHz into our POS enables NCR to provide our customers a fast, robust solution for implementing advanced operating systems and applications, while protecting their investment," said Bruce Donis, NCR general manager of POS systems. "Our relationship with Intel provides the availability of processors and stability for extended POS rollouts."

The first NCR workstations to feature the Intel processor will be available in the first quarter of 2002.

"This is a tremendous opportunity for Intel to introduce its high- performance, embedded processors into the retail industry with NCR, a company with unparalleled retail expertise," said Joe Jensen, general manager, Telecommunications and Embedded group, Intel Corporation. "Because the NCR POS workstations require high-performance processors with long lifecycles, the Intel Pentium III 1 GHz is the ideal product."
