

Teradata Maintains Clear Leadership Position in Overall Data Warehouse Comparisons from Leading Industry Analyst Firm

June 13, 2002 at 10:32 AM EDT

DAYTON, Ohio, Jun 13, 2002 (BUSINESS WIRE) --

Results reaffirm Teradata's leadership for three consecutive years in most important data warehousing metrics, while widening lead over competitors

Teradata, a division of NCR Corporation (NYSE:NCR), announced that for the third consecutive year it has maintained the overall leadership position in the newly released Gartner, Inc. Data Warehouse Application Server Evaluation Model (ASEM) update, while widening its lead over the competition.

Published annually as a guide for executives who are considering data warehousing solutions, the ASEM update evaluates how various data warehousing providers stack up against each other. The model calculates relative scores for all major database and hardware platforms based on the most important selection criteria for data warehousing in four categories: technology, market momentum, business practice and database.

Teradata's goal is to provide businesses improved decision-making through speed and agility in storing, analyzing and interpreting data. This business intelligence enables companies to better serve customers, drive operational efficiency, and ultimately be more profitable. These results are achieved through a comprehensive approach that provides not only the best technology for data warehousing, but superior service, partnerships and an experienced team that leverages Teradata technology to create high-value business solutions for businesses.
